Strategic Priorities

Dr. Tomya Amankwatia

- Taking the momentum online to 2023 requires a **bold, transformative digital education strategy** to ensure A&T's preeminence within a changing higher education landscape.
- Programs and protocols must be learner-centered, future focused and include: student, staff, faculty, and community engagement, process simplicity and agility, adaptable and repeatable support and business models, sustained value creation, and clear quality and evaluation metrics.
